stated billeting capacities are considered too high, even with regard to the modest requirements of the Rumanian soldier.

- (2) An engineer regiment with the cover No. 2212 was previously reported in Alba Julia by another source. The only engineer unit to have been identified with the numerical designation 6 was the 6th Bridge Construction Regt. It seems doubtful, however, if this regiment still exists.
- (3) As a 1st Bridge Construction Regt, identified in Alba Julia in 1948, had about the same strength as the 2d Bridge Construction Bn, it is assumed that the units may be the same and that the regiment was reduced to a battalion and redesignated (7).
- (4) The Militia Barracks was allegedly occupied by the 1st Militia Training Group in January 1950 (8).
- (5) A heavy artillery battalion of unknown assignment and designation was in the barracks in January 1950 (8).
- (6) The barracks had allegedly been occupied in early 1950 by an infantry regiment from Arad or Timisoara which was assumed to belong to the 2d Mtz Inf Div that had been withdrawn to the Banat after the Soviet troops had moved to the Arad-Timisoara area. This assumption has not been substantiated.
